1. While searching in the CROSSREF metadata, the digital attachment must be written by itself without the precedent (https://doi.org/) While searching in the CROSSREF metadata, the digital attachment must be written by itself without the precedent (https://doi.org/)

2. Hi, yes if you are using our search tools you can enter any piece of metadata - the DOI (without the URL), the author names, title, ORCID etc and we will show you what we have in our system associated with the metadata. 

3. The DOI number obtained is issued by the agency Crossref, and there are other agencies that issue DOIs. Do you find these identifiers have equal chances of being distributed, and how far they reach, especially from other registration agencies. What can I say that is a DOI registered in Crossref, is available in all of our APIs and tools that we have available. That is quite hard to answer as I have no data to support which DOIs are distributed, and how they are distributed. 

4. You can update resource resolution URLs associated with your DOIs by either resubmitting your metadata with the new URLs, or by sending us in support (support@crossref.org) a table-separaret of DOIs and their current URLs and we'll update them for you. We can send you a list of DOIs and their current URLs if needed. 

5. The DOI number obtained is issued by the agency Crossref, and there are other agencies that issue DOIs. Do you find these identifiers have equal chances of being distributed, and how far they reach, especially from other registration agencies. What can I say that is a DOI registered in Crossref, is available in all of our APIs and tools that we have available. Unfortunately, OJS is not our system so we're limited in how much we can help you in its use.

6. If you use the Open Journal system to deposit the digital ID for each research and it shows me a word submit "But don't turn into deposit". 

7. How to update the URL? can you show us? 

8. If you can tell us what kind of content you are trying to update we can give you more specific advice. 

9. Do you have any questions then feel free to reach out to support@crossref.org. 

10. If you still have questions then feel free to reach out to support@crossref.org. 

11. You can update resource resolution URLs associated with your DOIs by either resubmitting your metadata with the new URLs, or by sending us in support (support@crossref.org) a table-separaret of DOIs and their current URLs and we'll update them for you. We can send you a list of DOIs and their current URLs if needed. 

12. You can either contact us via email at support@crossref.org or alternatively post in our forum (https://forum.pkp.sfu.ca/) 

13. You can either contact us via email at support@crossref.org or alternatively post in our forum (https://forum.pkp.sfu.ca/)

14. Do you have any questions then feel free to reach out to support@crossref.org. 

15. Alternatively you can contact the Support team at PKP (https://pkp.sfu.ca/contact-us/), the organization responsible for the Open Journal System (OJS). 

16. Alternatively you can contact the Support team at PKP (https://pkp.sfu.ca/contact-us/)

17. You can update resource resolution URLs associated with your DOIs by either resubmitting your metadata with the new URLs, or by sending us in support (support@crossref.org) a table-separaret of DOIs and their current URLs and we'll update them for you. We can send you a list of DOIs and their current URLs if needed. 

18. We can send you a list of DOIs and their current URLs if needed. 

19. How to update the URL? can you show us? 

20. How to update the URL? can you show us?

21. If you have any questions then feel free to reach out to support@crossref.org.

22. If you still have questions then feel free to reach out to support@crossref.org. 

23. If you need to modify the paper and add it manually, you can either contact us via email at support@crossref.org or alternatively post in our forum (https://forum.pkp.sfu.ca/).
Hi Jameel, we work with a number of Sponsors who help smaller publishers in their country to join Crossref. They provide more cost-affordable membership fees and content registration fees (https://www.crossref.org/membership), plus the membership application form (https://www.crossref.org/membership/), on our website.

Unfortunately, OJS is not our system so we’re limited in how much we can help you in its use. You can learn more about PKP’s Crossref OJS Manual (https://docs.pkp.sfu.ca/crossref-ojs-manual/), plus there’s a very active PKP Community Forum (https://forum.pkp.sfu.ca) which has more information on how to modify your OJS instance to submit metadata and register DOIs with Crossref.

Alternatively you can contact the Support team at PKP (https://pkp.sfu.ca/contact-us/) who has more information on how to modify your OJS instance to submit metadata and register DOIs with Crossref.

Before you can submit metadata and register DOIs with Crossref, you need to sign up to become a Crossref member. We will then send you a prefix for your DOIs.

Content registration can be done by anyone who has access to the member credentials to submit metadata and register DOIs with Crossref.

Because DOIs are designed to be persistent, it is not possible to delete a DOI once created. However, you can edit the metadata and the resolution URL, and we encourage you to keep these up to date. If you have made a mistake such as a duplicate DOI we can also direct you to a new one. More information here: https://www.crossref.org/education/content-registration/creating-and-managing-dois/changing-or-deleting-dois/

Instead, you should contact the Support team at PKP (https://pkp.sfu.ca/contact-us/) with any questions you have about your OJS instance, such as how to modify it to submit metadata and register DOIs.

You can learn more at PKP’s Crossref OJS Manual (https://docs.pkp.sfu.ca/crossref-ojs-manual/), or contact us (https://pkp.sfu.ca/contact-us/).

PKP’s Crossref OJS Manual (https://docs.pkp.sfu.ca/crossref-ojs-manual/) is a comprehensive guide to submitting metadata and registering DOIs with Crossref. It covers everything from setting up your OJS instance with Crossref, to registering DOIs, and more.

We recommend that you use PKP’s Crossref OJS Manual (https://docs.pkp.sfu.ca/crossref-ojs-manual/) as your primary source of information. However, if you have questions about your OJS instance, you can contact the Support team at PKP (https://pkp.sfu.ca/contact-us/) who can provide additional guidance.

Whether or not you choose to use PKP’s Crossref OJS Manual (https://docs.pkp.sfu.ca/crossref-ojs-manual/) as your primary source of information, you can ask questions about your OJS instance at the PKP Community Forum (https://forum.pkp.sfu.ca) where other OJS users and experts can help you.

We do not have a formal relationship with ResearchGate but our APIs are open to the public so researchers can submit metadata and register DOIs with Crossref. Crossref has more information on how to modify your OJS instance to submit metadata and register DOIs with Crossref.
How to add DOIs for each abstract of a whole conference proceeding pdf form (OJS platform)

Unfortunately, OJS is not our system so we're limited in how much we can help you in its use.

You can learn more at PKP's Crossref OJS Manual (https://docs.pkp.sfu.ca/crossref-ojs-manual) plus there is a very active PKP Community Forum (https://forum.pkp.sfu.ca) which has more information on how to modify your OJS instance to submit metadata and register DOIs with Crossref.

Alternatively you can contact the Support team at PKP (https://support@crossref.org), the organization responsible for the Open Journal System (OJS).

PKP's Crossref OJS Manual (https://docs.pkp.sfu.ca/crossref-ojs-manual) plus there is a very active PKP Community Forum (https://forum.pkp.sfu.ca) which has more information on how to modify your OJS instance to submit metadata and register DOIs with Crossref

If possible, how to obtain membership and the registration steps?

Here is the membership application form:

https://www.crossref.org/membership/_apply/

This is an automatic deposit of content to the system. If you have any issues you would like to discuss about registration steps?

Is there a DOI for the journal site, or just the individual journal articles?

Hi, yes you can register a DOI for the journal title as well as the individual journal articles. More information here:

https://www.crossref.org/education/content-registration/content-type-markup-guide/conference-proceedings/

We used the old link with the .doi we went to it on the PDF for some years ago. Now we want to change the URL for these articles. Does it affect the DOI because OJS and the new system of yours does not use (doi) in the link

No, you can use either of the links for the DOI to work. The https://doi.org/ link is just the new version from doi.org to use so all new DOIs should be displayed using that link but the old will still work in exactly the same way.

The conference proceedings content type captures metadata about a single conference, such as date and location for example. DOIs should be assigned to all papers associated with the conference, and a DOI may be assigned to the conference itself. More information here:

https://www.crossref.org/education/content-registration/content-type-markup-guide/conference-proceedings/

We tried to use transfer data with OJS plugin we don't need to add data manually?

That is correct, if you enter the data into OJS and send this to us then you would not need to repeat the process in our system if the deposits from OJS were successful.

If we use transfer data with OJS plugin we don't need to add data manually?

Yes you can use the same prefix for all content registered under your account.

Is it sufficient scientifically to add one DOI for the whole conference proceedings?

In your website, you have mentioned that being a member of Crossref increases the exposure of the journal to a wider community, the question is, how?

If we transfer data with OJS plugin we don't need to add data manually?

Yes, you can add DOIs against all legacy works. We have article from centuries ago which have been registered with us.

We still can deposit content to the system. If you have any issues you would like to discuss about registration steps?

Is there a DOI for the journal site, or just the individual journal articles?

Hi, yes you can register a DOI for the journal title as well as the individual journal articles. More information here:

https://www.crossref.org/education/content-registration/content-type-markup-guide/conference-proceedings/

If possible, how to obtain membership and the registration steps?

Please email our support team with details of your deposit and we can look into this for you.

We used the DOI with the (dx) and is written on the PDFs of the articles for more than 3 years of publications. Now we changed the website and want to update the URLs. Does it affect the doi? I mean, does the old one will be ok even after the doi is resubmitted with the new URL without dx?

Mohammed Lafta

You can use either of the DOI displays the https://doi.org/ or the https://dx.doi.org/ and both will work exactly the same. The second one is the newer version from doi.org and so should be used on new DOIs but the older link also works fine.

Mouhammed Lafta

Are there specific standards for research to which DOIs are assigned?

No, there are no standards for research for which DOIs are assinged. A DOI is simply a persistent link to the location of that piece of research, it is not a mark of quality and we do no assessment of the research registered.

Ahed Diwan

Most of our research is local, and most of the researchers are Iraqis. Does it affect registration and future registration in Scopus?

You can register local research at Crossref just as easily as other research. You can also register your content in other languags and create a "relationship" in the metadata between the different language versions (https://www.crossref.org/education/content-registration/structural-metadata/relationships/). I cannot comment on future registration at Scopus as we are a separate entity.

Ahed Diwan

Hi

Is there any problem if one article registered with two different DOI link?

This could potentially cause issues with citations. If you wish to correct one of these to redirect to the correct DOI this is something we could help you with. Email support@crossref.org with the details. You can read more about this here: https://www.crossref.org/education/content-registration/creating-and-managing-dois/changing-or-deleting-dois/.

Sara Al-Saryia

Hi Sara,

Is there any problem if one article registered with two different DOI link?
