Install and setup MIDI remote scripts:

• copy folder “css_livectrl_xy” (and «css_mft_xy» for MIDI Fighter Twister) into “ableton\user library\remote scripts” and restart Ableton Live 12
• setup MIDI remote scripts in Ableton Live preferences/tempo&midi:

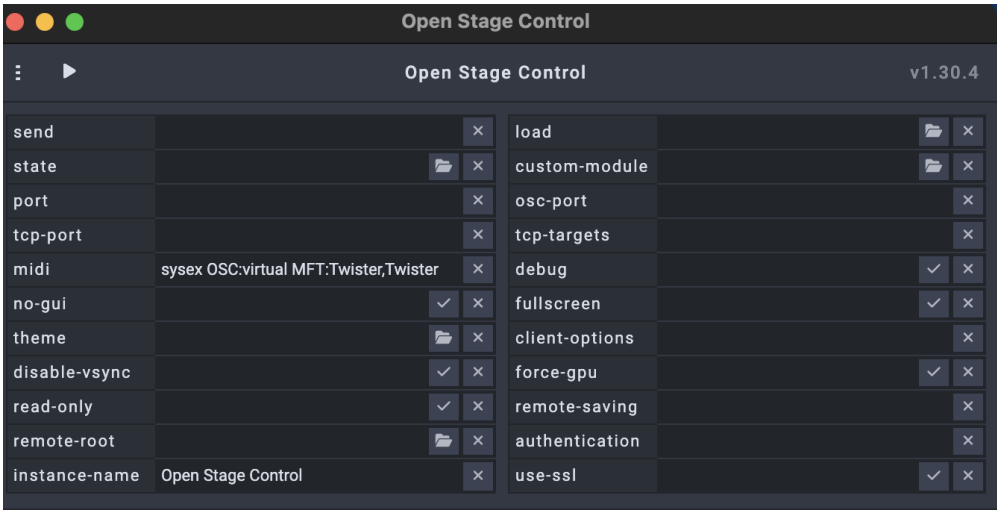

Install and setup Open Stage Control:

• load «LiveCtrl_xy.json»

• load «LiveCtrl-MFT CustomModule.js» into «custom-module»

• setup midi:

MIDI Fighter Twister:

• import «MFT CSS LiveCtrl 8.mfs» and click «send to MIDIFIGHTER» (this overwrites your current MFT settings !)
